About This Document

Summary

This document provides information regarding the features, main functions and services, technical specifications, and technical references of the product.

This document includes:

Chapter	Details
1 Product Overview	Provides an overview of the product.
2 Technical Specifications	Describes the specifications of the product hardware, software, and user interface.
3 Services and Applications	Describes the main functions and applications of the product.
4 System Structure and Scenario Constraints	Describes the product system structure.
5 Technical References	Describes the standards and communication protocols of the product.
6 Packing List	Describes the devices and accessories that comprise the product package

NOTE

The document is an invitation to offer but not an offer. It is intended to describe the general features and functions of a product. The features and functions of certain products may vary with the requirements of customers.

History

Issue	Date	Details
01	2019-04-11	Initial official release.
02	2019-04-12	Increase the N41 band description
03	2019-06-10	Remove content related to the N41/N77 band
04	2019-06-21	Remove LTE band B18/B19
05	2019-07-04	Refresh the data business content

Issue	Date	Details
06	2019-07-09	Refresh Antenna Gain
07	2019-07-25	Increase N41 band
08	2019-09-12	Add the LTE CA combination and EN_DC combination.

Acronyms and Abbreviations

Acronym or Abbreviation	Full Spelling
3GPP	3rd Generation Partnership Project
ACS	Auto Configuration Server
AES	Advanced Encryption Standard
ALG	Application Layer Gateway
AMR-NB	Adaptive Multi-Rate compression - Narrowband
AMR-WB	Adaptive Multi-Rate compression - Wideband
AP	Access Point
APN	Access Point Name
ARP	Address Resolution Protocol
CLAT	Customer-side Translator
CPE	Customer Premises Equipment
CS	Circuit Switched
CSFB	Circuit Switched Fallback
DBDC	Dual Band Dual Concurrent
DL	Downlink
DMZ	Demilitarized Zone
DNS	Domain Name Server
DTMF	Dual-Tone Multi-Frequency
E-UTRA	Evolved Universal Terrestrial Radio Access Network
FDD	Frequency Division Duplex
HOTA	Huawei Firmware Over the Air
IEEE	Institute of Electrical and Electronics Engineers

Acronym or Abbreviation	Full Spelling

Explanation

Some of the features described in this article are currently not supported by the product, and the expected implementation time is shown in the following table.

Features	Time
Voice and SMS	End of May 2019
802.11 ax	End of May 2019
5GHz Wi-Fi preferred	End of May 2019
HUAWEI HiLink	End of May 2019
CLAT	End of September 2019
HUAWEI SmartHome APP	End of May 2019
GCF Certification	July 2019

Note: The final supported features are subject to the actual product.

1 Product Overview

The HUAWEI 5G CPE H112-370 is a 5G wireless gateway for multiple users in household or small office environments. It enables users to access the Internet.

The H112-370 supports 3GPP Release 15 with UE downlink category 19 and uplink category 13. The supported service functions are as follows:

- Data service:

SA:

5G:

Downlink 1CC (100M), 4x4 MIMO, 256 QAM

Uplink 1CC (100M), 2x2 MIMO, 256 QAM

NSA:

5G:

Downlink 1CC (100M), 4x4 MIMO, 256 QAM

Uplink 1CC (100M), 1 T, 256 QAM

LTE:

Downlink peak rate: 1Gbps

Uplink 1CC, 1 T, 64 QAM

 **NOTE**

The actual data rate varies with network configuration.

- Working band: 5G: N41/78, LTE: B1/3/5/7/8/20/28/32/34/38/39/40/41/42/43
- Voice service: VoIP (Optional) / VoLTE (Optional)
- Wi-Fi: 802.11 b/g/n/a/ac/ax. 2.4GHz Wi-Fi 2x2 MIMO up to 300Mbps, 5GHz Wi-Fi 4x4 MIMO up to 4.8Gbps. Maximum Users: 2.4GHz Wi-Fi 32, 5GHz Wi-Fi 32
- 1 GE port for LAN/WAN, 1 GE port for LAN
- Multi APN function (Optional) for Data, Voice (VoIP), TR-069 services
- Routing mode: NAT enable (Default) / IP pass-through (Optional)
- VPN client service (L2TP, PPTP)
- Customer management via WebUI or HUAWEI SmartHome APP (iOS or Android)
- Operator maintenance via TR-069 (Optional) and TR-143 (Optional)
- Huawei Firmware Over the Air (HOTA)
- 5GHz Wi-Fi preferred

- HUAWEI HiLink

 **NOTE**

(1)All the preceding EN_DC combinations can only represent product capabilities. For details about the carrier's support, see the product configuration.

(2)B32 supports only SCC. All downlink EN_DC combinations with B32 do not support uplink inter-band CA.

2.3 Software Specifications

Table 2-7 Software specifications

Item	Description	
5G features	DL 4x4 MIMO	
	DL 256 QAM, UL 256QAM	
LTE features	DL 4x4 MIMO+5 CC Note: Based on the CA combination actually supported by the product and the corresponding MIMO number	
	DL 256 QAM, UL 64 QAM	
Mobile network	APN management APN auto adapter	
Gateway	Router	<ul style="list-style-type: none"> Supports the default route Supports manual configuration of LAN IP addresses Supports Address Resolution Protocol (ARP)
	DHCP server	<ul style="list-style-type: none"> The DHCP server can be enabled or disabled The address pool of the DHCP server can be configured The lease can be configured
	NAT	<ul style="list-style-type: none"> Supports NAT and NAPT (compliant with RFC2663, RFC3022, and RFC3027) Supports cone NAT
	ARP	
	ICMP	

Item	Description	
	IPv4v6 dual stack IPv4 only IPv6 only (Optional , CLAT for LAN side IPv4 device access Internet)  NOTE When the CLAT function is enabled, the IPv4 device Internet access service cannot reach the maximum throughput. Under IPv6 only, NAT-base service (such as port forwarding and port triggering) is not available VPN pass-through	
VPN client	<ul style="list-style-type: none"> • Support L2TP VPN client • Support PPTP VPN client 	
SMS (Optional)	<ul style="list-style-type: none"> • Writing/sending/receiving • Writing/sending/receiving extra-long messages 	
Data service	<p>SA:</p> <ul style="list-style-type: none"> • 5G: Downlink 1CC (100M), 4x4 MIMO, 256 QAM Uplink 1CC (100M), 2x2 MIMO, 256 QAM <p>NSA:</p> <ul style="list-style-type: none"> • 5G: Downlink 1CC (100M), 4x4 MIMO, 256 QAM Uplink 1CC (100M), 1 T, 256 QAM • LTE: Downlink peak rate: 1Gbps Uplink 1CC, 1 T, 64 QAM <p>WLAN 802.11b/g/n/a/ac/ax</p> <p>Supports multi APNs (Optional, one for data, one for voice, and one for TR-069)</p>	
Voice	VoIP (Optional)	Supports G.711a/G.711u/G.726 (-24/-32)/G.722/G.729 codec Supports SIP (RFC3261) Supports SDP (RFC2327) Supports RTP/RTCP (RFC1889/RFC1890/RFC3550) Supports in-band/SIP info/RFC2833 DTMF

Item	Description	
		Supports the following phone features: <ul style="list-style-type: none"> • Caller ID generation • Call waiting • Call forwarding (unconditional, busy, and no answer forwarding) • Call hold • Three-way conference
	VoLTE (Optional)	<ul style="list-style-type: none"> • Supports AMR-NB codec • Supports AMR-WB codec
		Supports in-band/out-band (RFC2833) DTMF
		Supports the following phone features: <ul style="list-style-type: none"> • Caller ID generation • Call waiting • Call forwarding (unconditional, busy, and no answer forwarding) • Call hold • Three-way conference • Originating Identification Presentation/Restriction • Outgoing Communication Barring
Firewall setup	<ul style="list-style-type: none"> • Firewall enable/disable • MAC Address Filter • IP Filter • Virtual server • Special Applications • DMZ settings • SIP ALG settings • UPnP settings • NAT settings • Domain Filter 	
LAN	<ul style="list-style-type: none"> • 100/1000 Mbps auto-negotiation • MDI/MDIX auto-sensing • IEEE 802.3/802.3u-compatible 	
WLAN	Broadcasts and hides service set identifiers (SSIDs)	
	Complies with IEEE 802.11b/g/n/a/ac/ax	
	WPS	
	WMM	
	Encryption	WEP, AES, and TKIP + AES

Item	Description	
	Security mode	<ul style="list-style-type: none"> • Open • WPA2-PSK • WPA/WPA2-PSK • WEP
	MAC address authentication	<ul style="list-style-type: none"> • Supports the MAC address authentication whitelist • Supports the MAC address authentication blacklist • Supports a maximum of 10 MAC address entries
	STA	<ul style="list-style-type: none"> • Supports inquiry of STA status • Supports a maximum of 64 connected stations
Operator maintenance (Optional)	<ul style="list-style-type: none"> • Supports TR-069 Amendment III • Supports TR-098 Amendment II • Supports TR-143 Amendment I • Supports TR-104 Amendment I (if VoIP is available) 	
USIM	PIN management and USIM card authentication	
NTP	Supports daylight saving time (DST) (Optional)	
HUAWEI SmartHome APP	<ul style="list-style-type: none"> • View data traffic usage and SMS • Manage connected devices • Change CPE's SSID and password 	
System requirements	Operating system	Windows 7, Windows 8.1, Windows 10 (Not support Windows RT), MAC OS X 10.12, 10.13 and 10.14 with latest updates
	Web browser	<ul style="list-style-type: none"> • Microsoft Internet Explorer 8.0 and Microsoft Edge with latest updates • FireFox 49.0 with latest updates • All major versions of Chrome in the last year (53.0 with latest updates) • Safari 10.0 with latest updates (MACOS)
	Your computer's hardware system should meet or exceed the recommended system requirements for the installed OS version	

3 Services and Applications

3.1 Data Services

The H112-370 can access the Internet through mobile networks and Ethernet networks. By connecting to the H112-370 using Wi-Fi or a network cable, users can obtain access to high-speed Internet services and establish a local area network (LAN).

3.1.1 Accessing the Internet through a Mobile Network (5G/LTE)

The H112-370 can access the Internet through mobile networks.

Figure 3-1 Accessing the Internet through a mobile network

3.1.2 Accessing the Internet through an Ethernet Network

The H112-370's LAN/WAN port can be connected to a wall-mounted Ethernet port using a network cable.

Figure 3-2 Accessing the Internet through an Ethernet network

3.2 Voice Services

The H112-370 provides one telephone port that can be connected to telephones for calling.

3.3 SMS

The H112-370 supports message writing/sending/receiving and group sending (up to 50 -contacts at a time).

3.4 Security Service

The H112-370 supports comprehensive and robust security services. It provides a firewall function and PIN protection mechanisms. These features allow users to connect their

computers to the Internet and simultaneously protect their computers against security threats from the Internet.

3.4.1 Firewall Service

The H112-370 supports the enabling or disabling of a firewall on the network connection, which protects the device and network from attacks by hackers on the Internet and controls access to the Internet.

3.4.2 MAC Filtering

The H112-370 supports configuration of the Media Access Control (MAC) address to restrict network access.

3.4.3 Wi-Fi Authentication

The gateway supports the following user authentication protocols for WLAN:

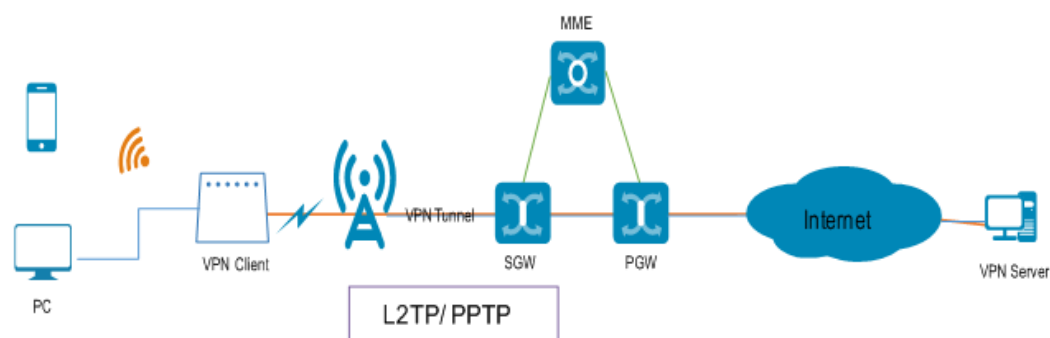

- No encryption
- WEP, WPA2-PSK (AES), WPA/WPA2-PSK (TKIP/AES).

3.5 VPN Function

3.5.1 VPN Client

VPN tunneling involves establishing and maintaining a logical network connection (that may contain intermediate hops). On this connection, packets constructed in a specific VPN protocol format are first encapsulated within some other base or carrier protocol, then transmitted between the VPN client and server, and finally decapsulated on the receiving side.

The H112-370 supports L2TP and PPTP tunneling protocols.

3.5.2 VPN Pass-Through

The H112-370 supports L2TP/PPTP VPN pass-through for the LAN side device. The LAN side device can create a VPN tunnel to the VPN server.

3.6 IP Pass-Through

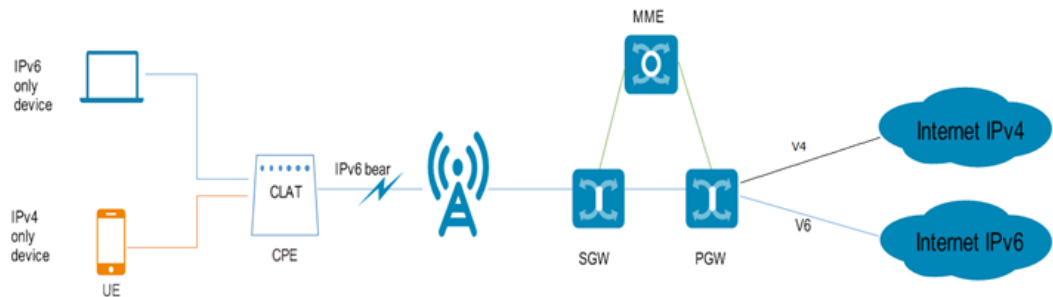

The LTE CPE obtains the WAN IP address and passes it through to the PC (Case 1) or Router (Case 2), and then the PC (Case 1) or Router (Case 2) can directly use the WAN IP address.

3.7 IPv6 Only and IPv4v6 Dual Stack

3.7.1 IPv4v6 Dual Stack

CPE provides dual stack function.

3.7.2 IPv6 Only (CLAT)

The LTE CPE supports IPv6 only with the transition solution CLAT for IPv4 device.

NOTE

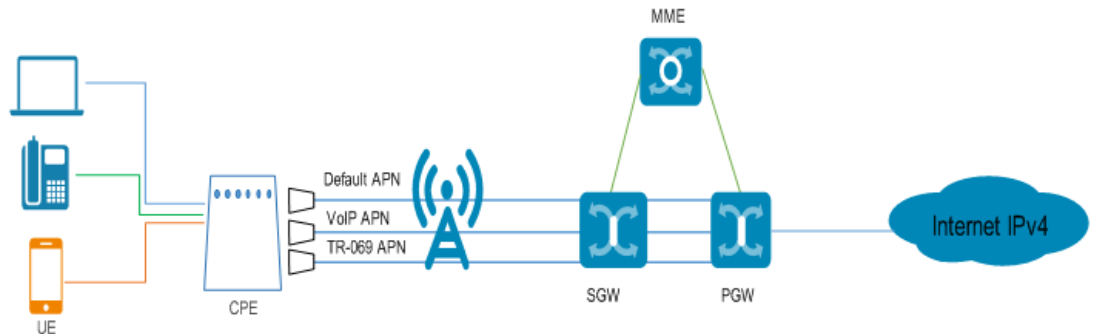

When the IPv6 only (CLAT) function is enabled, NAT-based functions (like DMZ/Port Forwarding/Port trigger) cannot be used.

When an IPv4 device accesses the Internet, the performance is degraded because packets need to be packetized and unpacked. However, IPv6 devices are not affected.

3.8 Multi-APN

The H112-370 supports the establishment and maintenance of three APNs. These three APN connections isolate data, voice, and remote management services on an operator's network.

The H112-370 supports an independent APN for CPE internal/VoIP/TR-069.

3.9 5GHz Preferred

Priority usage of 5 GHz Wi-Fi band over 2.4 GHz band when signal strength is equal to increase connection speeds.

3.10 HiLink

- Supports HiLink routers to connect to H112-370 through the Hi button to create an expanded network.
- Supports quick connection between a HiLink device (such as Honor set-up boxes, Honor handsets and HUAWEI handsets running on EMUI 5.0 and later) and H112-370 through the Hi button.

3.11 Customer management

3.11.1 WebUI

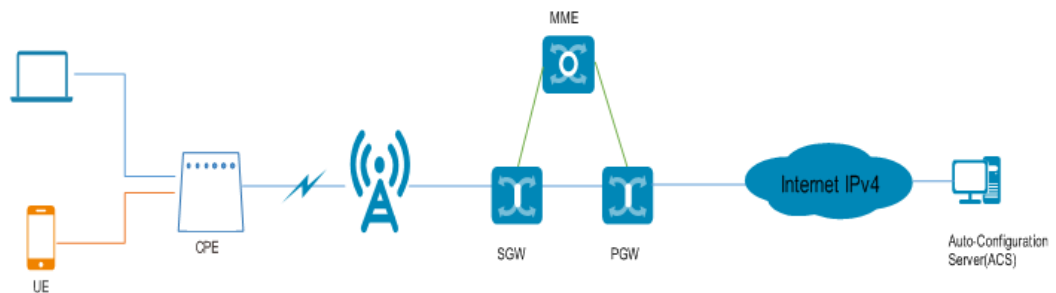

The H112-370 supports local configuration through the Web UI. You can perform device management and network configuration to ensure normal and stable performance.

3.11.2 HUAWEI SmartHome APP

Scan the QR code (can be found in the Quick Start Guide and Web UI) to download the HUAWEI SmartHome APP and configure the router from your phone.

3.12 Operator maintenance

The H112-370 supports Operator maintenance through the TR-069. Operator remote manages the CPE software update/parameters configuration via TR-069.

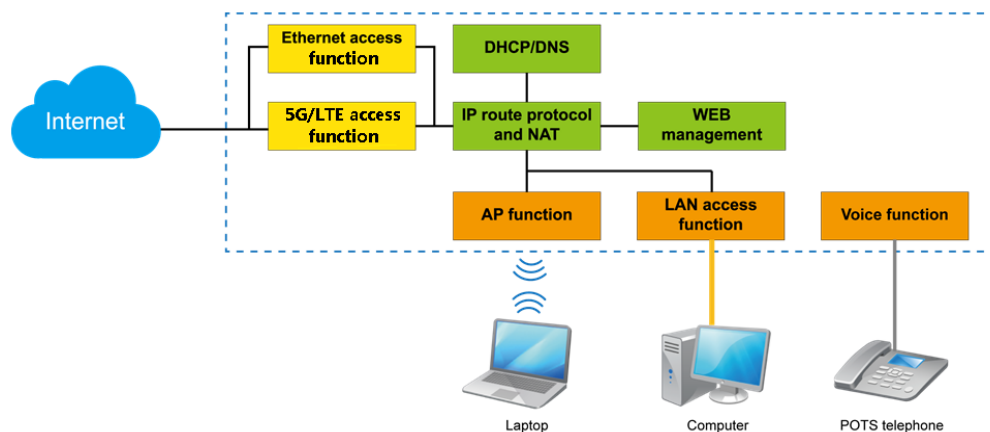

3.13 HOTA

The H112-370 supports the HOTA feature, which allows users to remotely update the device firmware through the HOTA server.

4 System Structure and Scenario Constraints

4.1 System Architecture

Figure 4-1 System structure

The following describes the modules shown in Figure 4-1.

- 5G/LTE access function: The H112-370 adopts the 5G/LTE access technology at the WAN side.
- LAN access function: One 100/1000 Mbps high-speed Ethernet ports are provided at the LAN side. The H112-370 provides the switching function for local networking and sharing of the broadband network when it is connected to terminal devices.
- AP function: An 802.11b/g/n/a/ac/ax-compliant WLAN AP interface is provided for wireless networking at home. The interface is compliant with the IEEE 802.11b/g/n/a/ac/ax standard and the WEP, WPA/WPA2-PSK, WPA2-PSK security authentication mechanisms.
- DHCP/DNS: The DHCP server dynamically allocates IP addresses to PCs.
- Web-based management: You can configure the H112-370 and modify and view the configuration of the H112-370.

- IP routing protocol and NAT: The H112-370 has high-speed routing capability. With the built-in NAT, the H112-370, together with terminals, can provide flexible broadband access solutions and networking schemes.
- Voice function: The H112-370 supports voice services.

4.2 Scenario Constraints

The H112-370 is a household wireless broadband access product designed for use in scenarios with relatively few network access devices and relatively low network reliability requirements, such as homes or small office and home offices (SOHOs).

The H112-370 is not an enterprise-grade product. It cannot be used by medium- or large-sized enterprises or in scenarios with high network reliability requirements, such as banks, securities agencies, traffic control, and communications device backhaul.

The H112-370 has the following constraints:

- When the IP Pass-Through mode is enabled, the HOTA function cannot be used.
- When the L2TP/PPTP VPN client function is enabled, the throughput performance will slow down.
- A maximum of 64 devices can be connected to the WLAN in theory; the actual number of devices that can be connected and served depends on actual conditions.
