Netgear Nighthawk M2 MR2100 4G Router Modification Instructions:

Warranty Notes:
- This modification voids all warranty rights with manufacturer and therefore shall not be returnable under warranty to the manufacturer.
- Do not open the unit once modified, doing so may damage the new antenna outputs. Any attempt to open the unit causing damage to the outputs are a chargeable repair.

Antenna notes:
- The internal antennas WILL still function without the external antennas connected.

Software Configuration:
- There has been No firmware/software adaptations to the router during the modification process.
- During testing of the modification, the router will have been restored to factory default setting, any setting that were previously on the unit have been lost.

This modification will allow the use of the new external inputs in any of the below configurations.
