

## MODIFICATION USER INSTRUCTIONS

MikroTik Chateau LTE18 ax 4G Router Modification Instructions:

### Warranty Notes:

- This modification voids all warranty rights with manufacturer and therefore shall not be returnable under warranty to the manufacturer.
- Do not open the unit once modified, doing so may damage the new antenna outputs. Any attempt to open the unit causing damage to the outputs are a chargeable repair.

### Antenna notes:

- Please note this modification has converted the internal antennas to external antennas.
- The internal antennas are no longer functional as they are now converted for external antenna use.

### Software Configuration:

- There has been No firmware/software adaptations to the router during the modification process.
- During testing of the modification, the router will have been restored to factory default setting, any setting that were previously on the unit have been lost.
- (if your unit has factory antenna outputs) Please ensure within the router login page, you have **selected "use EXTERNAL antenna"** this ensure the use of the modified antenna outputs. (Some routers do not have this option available)

**Port Frequency band Ranges:** (please Refer to the routers specifications and your local network band support list for compatibility)

### 4G Ports:

- **Low Band – 700~900Mhz (Bands 8,20,19,6,5,18,26,27,14,13,17,28,68,12,85,,71,31,72,73,88,87,29,67)**
- **Mid Band – 901~2100Mhz (Bands 70,25,2,9,3,24,21,11,74,32,75,76)**
- **High Band – 2101~3500Mhz (Bands 22,7,15,16,69,30,23,66,65,1,10,4)**

This modification will allow the use of the new external inputs in any of the below configurations.
